BUSINESS TIMELINE & GROWTH

COMPREHENSIVE SOLUTIONS

MANUFACTURING

With 7 decades of innovation, 8 industry verticals, 7 manufacturing units, provides state of the art manufacturing process

DESIGN STUDIO

From initial sketch, reference image or conceptual idea, the studio bring fashion concepts to life through expert design development, sourcing, pattern-making and sample production.

WASHING

Equipped with sustainable Jeanologia OZONE technology, advanced nano-bubble machines from Tonello, and high-performance dryers from Tupesa for eco-conscious, premium garment finishing.

EMBROIDERY

Powered by advanced Barudan and Maya machines, delivers exceptional precision, lasting durability, and uncompromising quality in every stitch.

OUR STRENGTH

Strong Fabric Sourcing Capability

We maintain a robust network of local and international mills, allowing us to source the right fabric quickly and cost-effectively.

Global Research & Trend Support

Our dedicated team continuously studies global fashion trends and market demands to provide updated design and product insights

Versatile Product Capability

We offer a wide product range, including denim and non-denim, across multiple lifestyle categories to meet diverse buyer needs.

Quick Order Execution (60-Day Turnaround)

Our efficient planning and production setup enable us to complete fast-track orders within 60 days.

Traceability & Transparency-Focused Operation

We maintain transparent processes across sourcing, production, and compliance to ensure ethical, reliable, and audit-ready operations.

Strong Commitment to Quality & On-Time Delivery

Consistent quality control and disciplined workflow allow us to deliver every order on time with expected quality standards.

Material Traceability

End-to-end raw material tracking ensures quality, sustainability, and full visibility for buyers.

Focus on Local Sourcing

We prioritize local raw materials to reduce lead time, increase agility, and support faster sample-to-production cycles.

PRODUCTION CAPACITY

FULL CAPACITY DETAILS

MONTHLY PRODUCTION CAPACITY

- Total: 3.5 million pieces
- Woven Tops: 2.5 million pieces
- Woven Bottoms: 1.0 million pieces

SALESMAN SAMPLE PRODUCTION

3 dedicated SMS lines to support SMS production

VERSATILE MANUFACTURING CAPABILITY

Capable of producing a wide range of products, including both formal and casual shirts, pants, ladies' blouses, dresses, denim and twill jackets, shackets, quilted shirts and jackets.

FULL CAPACITY DETAILS

INDUSTRIAL LAUNDRY FACILITY

- Specializes in versatile types of washes for woven tops.
- Equipped with sustainable washing technology, including E-Flow machines, laser processes, and ozone wash facilities.
- Uses EIM software to measure and score sustainability.

PHYSICAL TESTING LAB

- Fully equipped with advanced European machinery for rigorous testing

ACCESSORIES UNIT

- Capable of producing buttons, labeling, and packaging materials in-house.
- Ensures better control over production with in-house printing and embroidery facilities.

STATE-OF-THE-ART EMBROIDERY UNIT

- Equipped with advanced embroidery machines from Barudan and Maya, known for their precision and durability.
- High stitch capacity supports efficient daily production.
- In-house printing, embroidery, and finishing enhance quality control.

TECHNOLOGY INTEGRATION

Technology Integration

We use Software to design fabric and provide quick feedback to the buyers designers by making CAD

We use CAD software in the development process that helps reduce the lead-time and cost of development

To ensure better use of capacity and making sure of timely shipment we plan our production process in globally renowned software

Production tracking software from cut to pack.

Enterprise Resource Planning Solution

Customized ERP (EBS) for efficient business processes and control

Our designers use WGSN for trend research and provide feedback to the customer

AUTOMATION

Continuous adaptation to automation ensures every process stays optimized, integrated and consistently efficient.

HOLISTIC APPROACH TO DESIGN INNOVATION

3D SOFTWARE: BROWZWEAR & CLO

Dekko ISHO has embraced cutting-edge technology to enhance the **digitalization of fashion, improve garment fitting accuracy, and create virtual sample collections**. These advancements streamline Tech Pack development, optimize BOM management, and significantly reduce Lead Time, providing exceptional design support to clients.

USE OF FABRIC DESIGN SOFTWARE: TEXTRONIC

This innovative software allows designers to visualize multiple fabric design variants, facilitating quick decision-making in the design process. By streamlining the selection of fabrics, it enhances creativity and efficiency, ensuring a more dynamic and responsive approach to fashion design.

SUSTAINABLE SOURCING

- Upcycling Partnership
- Localized Sourcing of Trims and Accessories
- Recycling Initiatives
- Ensuring traceability of suppliers and raw material

INVESTMENT PLANS FOR THE FUTURE

RESEARCH & DEVELOPMENT

- **R&D Investment:** Continuous investment to drive innovation and boost consumer trust. Open to all kinds of collaboration. Investing on global talent for design excellence.

SUSTAINABLE TECHNOLOGY

- **Renewable Energy:** Expanding solar power capacity and engaging in various environmental initiatives
- **Environmental Projects:** Implementing projects like steam water condensate recovery, air leakage recovery, and rainwater harvesting.

OUR SUSTAINABILITY JOURNEY

Traceability Programs

Environmental Sustainability Programs

Lub-rref(Bangladesh) Ltd.

FWD > > ENV

Green Manufacturing
Project by KIABI

Blue water

Rainwater Harvesting (RWH)

RWH (150 m³ capacity) cuts groundwater use, reduces dependence on imported water, and saves water and energy, supplying 21% of annual demand. GGL, DRL, and AFL plan to install RWH systems by 2025.

Grey water

Water Reuse Initiatives: STP & ETP

We use STP and ETP systems to recycle water for flushing, gardening, plantation, car washing, and more. STP: 15 m³/hr, currently meets 20% of demand, with a target of 40% by Dec 2025. ETP: 130 m³ capacity.

 **Reverse
Resources**

Reduce | Reuse | Recycle

Dekko ISHO Group is partnering with Reverse Resources to recycle textile cutting waste and biodegradable materials like paper and used lube oil.

Benefits: Less landfill waste, lower emissions, resource conservation, and support for sustainable fashion. Join the movement with the Clothes Bin Franchise.

Achieving 80% Renewable Energy with Energy Efficiency Strategies

Current Status:

Renewable Energy:

- Dekko Garments Ltd. 1.7 MWp
- Dekko Readywears Ltd. 33 KWp
- Globus Garments Ltd. 28 kWp

Planning for 80% Clean Energy by 2030: Solar, I-REC & Efficiency

- 1 MWp will be completed by 2026 in the extended Unit at DGL
- 924 kWp feasibility study is in progress at Agami Fashions Ltd. & Agami Washing Ltd.
- 100 kWp will be installed by 2027 at Globus Garments Ltd.
- 13,421 MWh I-REC has been purchased for 2025.
- 80% Scope-2 GHG Emission Reduced for 2025.
- Increasing daylight.
- LED lighting.
- VFD for Compressor.
- Energy-efficient fans.
- Replace Clutch Motor with Servo Motor.
- Installation of Economizer in Boiler.
- Installation of Air Trigger Nozzle.
- Replace the blower with an energy-efficient fan.
- Waste heat recovery system.
- Biomass Boiler
- Feasibility of BESS

Optimizing Water Use: 40% Water Reduction Strategy

Current Status:

- Push Taps at all Units.
- Awareness Training.
- Rainwater Harvesting System at Dekko Garments Ltd.
- Sewage Treatment Plant at Dekko Garments Ltd.
- Water-efficient machines at Agami Washing Ltd.

Planning for achieving 40% water reduction by 2025:

Globus Garments Ltd.

- 1 m³/hr Rainwater Harvesting System.
- 5 m³/hr Grey Water Treatment Plant.
- 5 m³/hr Sewage Treatment Plant.

Agami Fashions Ltd & Agami Washing Ltd.

- 3 m³/hr Rainwater Harvesting System.
- 5 m³/hr Grey Water Treatment Plant
- 5 m³/hr Sewage Treatment Plant

Dekko Readywears Ltd.

- 3 m³/hr Rainwater Harvesting System.
- 5 m³/hr Grey Water Treatment Plant.
- 3 m³/hr Sewage Treatment Plant

Planning for achieving 40% water reduction by 2030:

130 m³/hr ETP and planning to ZLD by 2030

Effective 40% Waste Recycling Strategy for a Greener Future

Current Status:

Textile Waste Recycling with **Reverse Resources**

- Textile Waste Recycled in Sep'24 to Feb'26- **650 TON**
- Textile Waste Recycling- **40%**

Other Waste Recycling Initiatives:

- **Paper** with **Base Paper Ltd.**
- **Used Lube Oil** with **Lub-rref (Bangladesh) Ltd.**
- **E-Waste** with **JR Recycling Solutions Ltd.**

Planning for achieving 40% waste by 2030:

- Thread Cone
- Plastic
- Poly
- Cartons

Cutting Waste Recycling into Cotton fiber By Reverse Resources

Recycle and trace Cutting Waste into blankets and mattresses by informal Suppliers

Creating Shared Value

- Provide nutritional, welfare, and educational support to underprivileged children.
- Community Welfare Organizations such as Shishu Palli Plus offers financial assistance to support social development initiatives.
- Extend medical and financial assistance to current and former employees.
- Ensure food security during various festivals and special occasions.
- Distribute essential supplies during cold waves.
- Klubhaus donates clothing annually to Aastha Trust during Eid.

ecovia[®]

Ecovia, a portfolio startup of Dekko ISHO Venture Capital, one of our SBUs, turns clothing waste into durable, compostable packaging that returns to nature.

Ecovia's mission is to replace single-use plastics with practical, eco-friendly alternatives, combating plastic pollution and preserving the delicate balance of nature. By offering compostable polymer packaging materials, the initiative takes concrete steps to prevent soil contamination from harmful microplastics.

WELL BEING & SUPPORT

A S T H A S H O P

Fair Price Shop (Astha Shop)

Workers can purchase products at 5 to 20 percent lower than the MRP, making high-quality items more affordable. Additionally, it reduces the need for frequent market visits, as products are conveniently available at their workplace.

- Baby Daycare
- Medical Camp
- Cultural Activity
- Psychological Counseling
- Training & Workshop

CSR ACTIVITIES

- Annual financial donation to Shishu Polli Plus, supporting single mothers and displaced children.
- Providing nutritious food to pregnant and lactating workers and childcare babies.
- Tree Plantation program for local community and workers on World Environment Day.
- Psychological Counseling Center for employees to improve problem-solving and conflict-resolution skills.
- Free Medical Campaign for the local community and workers' family members.
- Career opportunities for the disabled.
- Relief Programs and Donation Initiatives during disasters.

- Development of Innovation & Cooperation
- Successfully Reduce at least 5 Work Steps by 5S and KAIZEN
- Successfully Reduce at least 25% Process time

ROADMAP TOWARDS 2030

Our manufacturing portfolio is expanding with the addition of a dedicated facility for dress shirts and other formal wear.

A new outerwear and performance apparel unit is being developed, equipped for producing fake-down jackets, quilted jackets and seam-sealed garments.

Plans are underway for the establishment of an overseas manufacturing unit by 2030.

Commitment to achieving the sustainability targets set for 2030 remains a key strategic priority.

Building strategic partnerships with industry leaders to drive mutual growth and leverage shared expertise.
